Halo 😊

I'm Otto – Junior Front-end Developer. After 6 years of losing time in university of doing nothing I decided to learn programming. Funny part for me was front-end. It visualized what I was doing during typing first code. I had little touch with C++ from university but I truly did not know that it was programming…

Then I went to Softgen where I started to learn and understand the world of programing with C++ ➔ Front-end.

I tried backend on java but it was not funny for me.

Searching internship for my first job on junior front-end react developer position.

Education:

1. *Georgian Technical University:*

Faculty: Informatics & Control Systems.

Bachelor + Master Degree – Engineering Physics.

2. *Softgen*

C++, Html/Js/Css, React, Bootstrap/React-Bootstrap/Chakra-UI.

Experience:

1. Non-Programming Exp: Up to 2 Years.

   Teacher of Physics;
   Operator of Accountant.

2. Programming Exp:

   C++ Mentor since 2022 – Fundamentals of Algorithmization, Data structure and Algorithmization.
